COMPANY ENVIRONMENTAL POLICY STATEMENT

Midland Ducting Ltd shall ensure that our operations comply with and where possible exceed environmental legislation and approved codes of practice whilst co-operating fully and maintaining open relationships with all regulatory authorities.

The company is committed to the process of enhancing its environmental performance and will continually measure and monitor standards and implement improvements whilst ensuring that all personnel are trained and aware of environmental issues and the environmental impact of their activities.

Midland Ducting Ltd are committed to increasing the percentage of materials recovered and recycled and reducing the amount of waste being land filled. By raising awareness of the benefits of separation at source we aim to maximise reuse and the amount of energy recovered from waste by minimising the use of materials and non-renewable resources.

We are dedicated to assisting our customers in reducing their environmental impact by providing reprocessing services and developing markets for secondary materials. Midland Ducting Ltd will use contractors and suppliers who hold environmental standards compatible with our own where practicable.

This policy will be communicated to all employees and made available to interested parties and audited to ascertain that the information contained within it is understood and accomplished. The policy will be reviewed periodically to ensure that it evolves with the company's activities and legislation as well as the needs and expectations of the community.

Adequate resources will be allocated for the development of the company environmental management system and for the training of all employees.

The company will take all practical steps to prevent or diminish harmful impacts on the environment, which may result from our activities.

The company will maintain an Environmental Management System throughout its operations subject to recognised environmental programmes. The system will include the requirement for a comprehensive report and audit programme which will be designed to progressively reduce the impact of the company's operations in key environmental areas.
